

## YDs Will Hear UA's McDonald

University of Arizona physicist, Dr. James H. McDonald, will speak before the Young Democrats Club at its meeting tomorrow noon.

McDonald is expected to repeat charges he has made that the Air Force has selected missile sites that will be detrimental to populated areas because of fallout caused by the enemy's counter-missiles.

McDonald is senior physicist in the UA Institute of Atmospheric Physics.

The Young Democrats meet at El Charro Restaurant, 140 W. Broadway.
