

Museum Will Offer Science Lectures

A science lecture series will be offered again this fall by the Arizona-Sonora Desert Museum.

This season's first program will be presented Oct. 27, featuring a talk by Dr. James E. McDonald, senior physicist of the University of Arizona's Institute of Atmospheric Physics.

His talk on "Fallacies Concerning the Influence of Inland Lakes on Arid Region Rainfall" will be given at 8 p.m. in the UA Physics-Mathematics Building auditorium.

Plans call for a program to be presented each month.

Future speakers and their topics are Dr. Robert DuBois, "Geo-magnetics"; and Dr. E. Lendell Cockrum, "Migration of the Mexican Freetail Bats."
