# Mesh for the Pipe With Weld

Table 1 Mesh table

	$n_r$	$n_\theta$	$n_z$	$n_{tot}$ (million)
Mesh0	65	32	260	0.533
Mesh1	77	40	274	0.833
Mesh2	90	48	294	1.26
Mesh3	257	48	623	7.655

# Current Problems With Fine Mesh

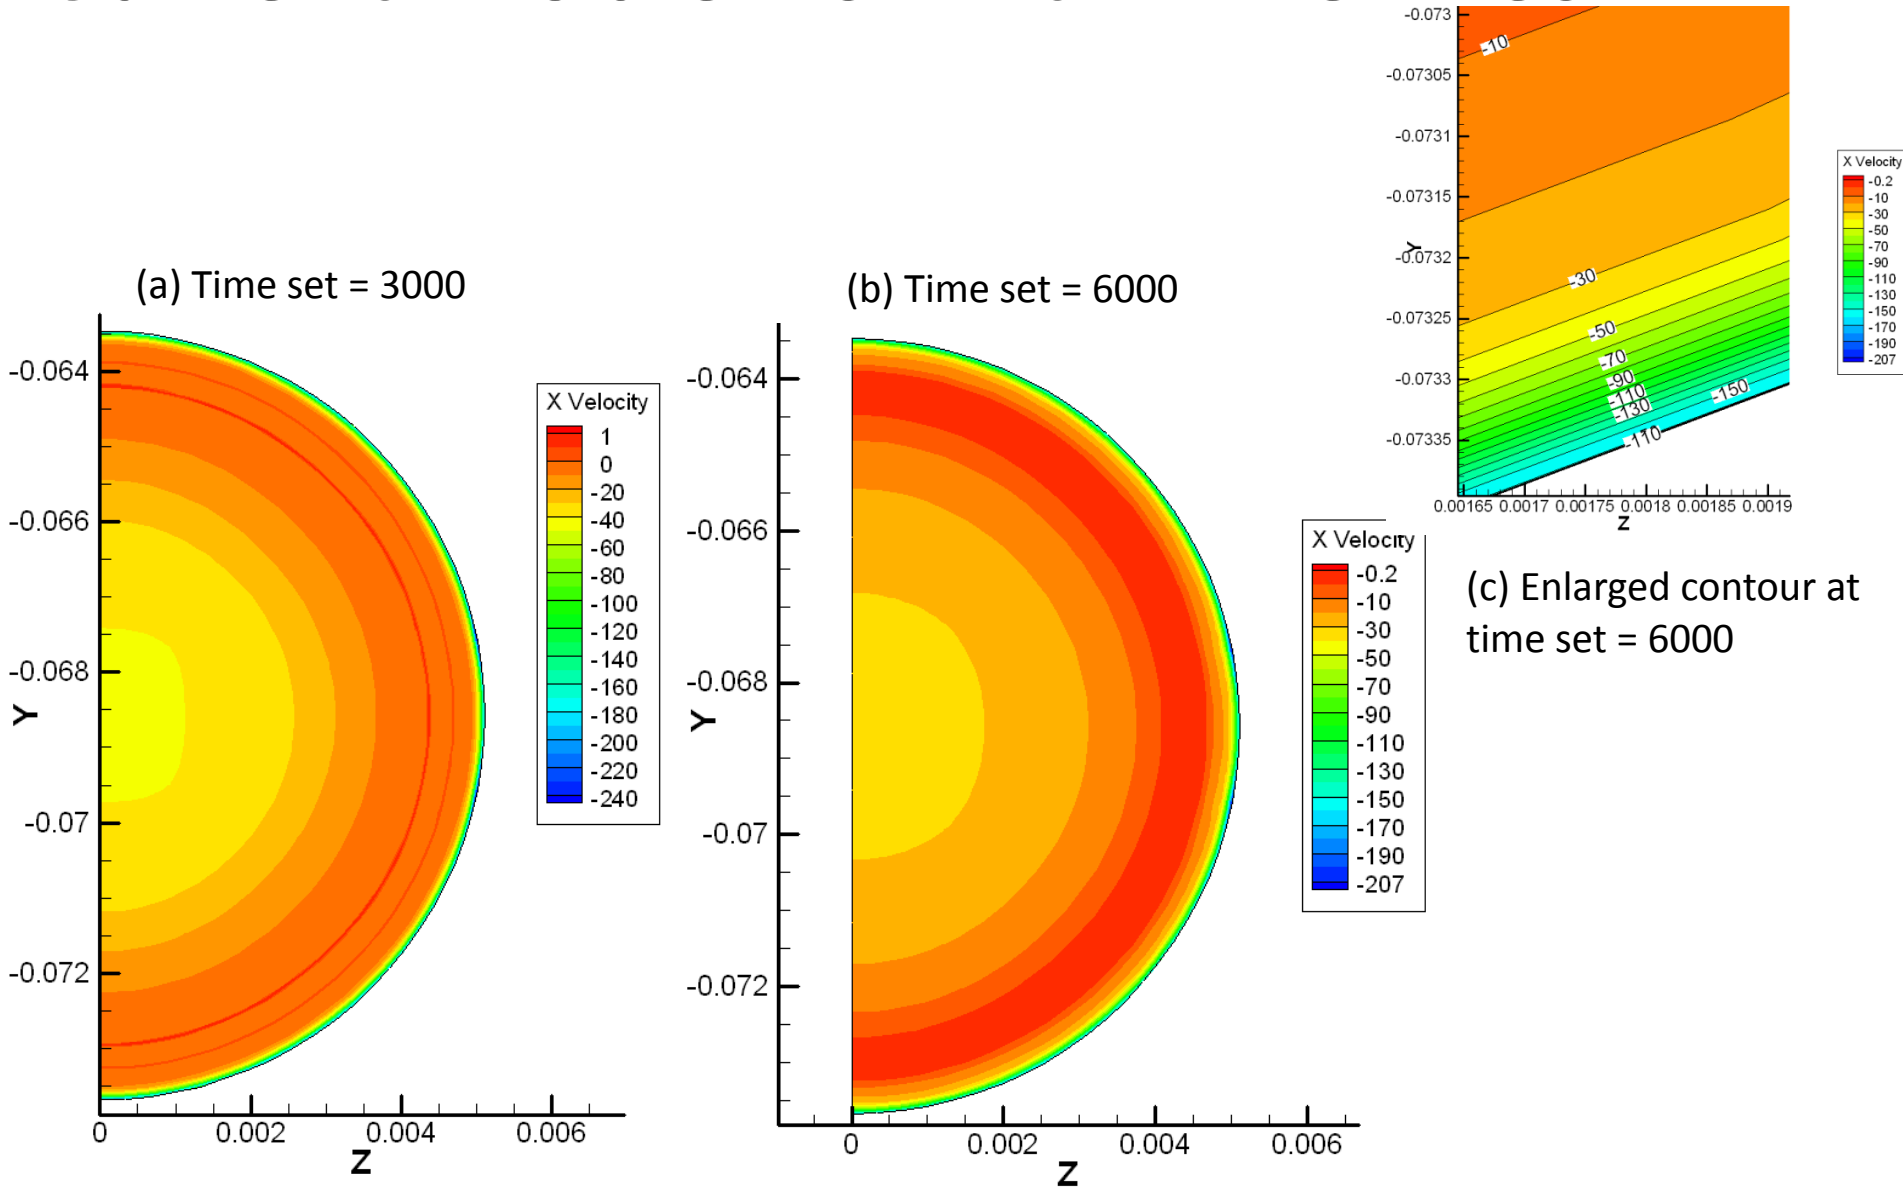

Fig. 4 Results of axial velocity at the exit plane through 12 processes computation at Feynman

# Solutions

## 1) Coarser Mesh

	$n_r$	$n_\theta$	$n_z$	$n_{\text{tot}}$ (million)
Mesh0	65	32	260	0.533
Mesh1	77	40	274	0.833
Mesh2	90	48	294	1.26
<b>Mesh3</b>	<b>257</b>	<b>48</b>	<b>623</b>	<b>7.655</b>

	$n_r$	$n_\theta$	$n_z$	$n_{\text{tot}}$ (million)
Mesh0	65	32	260	0.533
Mesh1	77	40	274	0.833
Mesh2	90	48	294	1.26
<b>Mesh3</b>	<b>147</b>	<b>48</b>	<b>517</b>	<b>3.623</b>

## 2) Longer simulation for lower order solver
